

APFUS 2024

February 22-24, 2024 | #337, Central administration building, Yonsei University, Seoul, Korea

Justin Cheng-chia Lee, MD, PhD

Taipei Veterans General Hospital, Taiwan

Dr. Lee is a functional neurosurgeon at Taipei Veteran General Hospital, who specializes in Gamma Knife radiosurgery, epilepsy surgery, focused ultrasound, and intra-operative neuromonitoring. He is the **Secretary General** of the Taiwan Society for Stereotactic Functional Neurosurgery and Radiosurgery (TSSFNR) during 2015 to 2021. Currently, he is **Committee Board member** of International Gamma Knife Research Foundation, **Taiwan representative of International Committee** of AANS and CNS Tumor Section, **Committee Board member** of Asian-Oceanic Society for Intraoperative Neurophysiology (AOSIN). He has ever hosted several Asian meetings, such as 11th meeting of Asian-Australian Society for Stereotactic and Functional Neurosurgery (AASSFN) in 2018, 13th Asian Epilepsy Surgery Congress (AESC) in 2020, 7th Asian Leksell Gamma Knife Society meeting (ALGKS) in 2020, and 3th/5th meeting of Asian-Oceanic Society for Intraoperative Neurophysiology (AOSIN) in 2021 and 2023.

His research interests mainly focus on epilepsy network, SEEG signal analysis, and radiosurgery for brain metastasis. Until now, he has published 263 articles and 65 international conference papers. Since 2014, he got several awards including Outstanding Paper Award from Taiwan Neurosurgical Society, Young Researcher Scholarship from Taiwan Epilepsy Society, Young Researcher Scholarship from Taiwan Pain Society, and Young Neurosurgery Award (Top 15) from World Federation of Neurosurgical Societies (WFNS).
